

LIVE-FIRE TRAINING AVAILABLE!

LIVE-FIRE TRAINING AVAILABLE! [CLICK HERE TO REGISTER!](#)

Contractors know that keeping pace with changing technology is essential to keeping their credentials current. NTI knows this, too. That is why we offer in-person and online training: to meet Contractors where they are, at a time and location that is convenient and accessible.

We invite you to join us in our state-of-the-art training facilities in New Bedford, MA, USA or Saint John, NB, Canada for live-fire product training. Our best-in-class Training Team hosts two-day classes throughout the year, giving you an immersive continuing education experience with our products, accessories, and NTI NET smart-technology. For more information, or to register, visit our Training page at <https://ntiboilers.com/traininginformation>.

Prefer to train online? NTI is proud to sponsor the “Thirsty for Knowledge Thursday” show with [Steve “Wheels” Weiland](#). This twice monthly, 30 – 60-minute podcast-style webinar is designed to meet your continuing education needs, with both product initiation and product installation episodes.

With his down-to-earth, straight-talk style Steve will take you step-by-step through the learning process, fielding live questions from listeners like you! With new episodes every **first and third Thursday of the month**, you can tune-in LIVE via the links posted to our social media pages, or catch the pre-recorded and archived shows on the NTI Training Channel at <https://www.youtube.com/@NTITraining>
